## Finger Templates and Instructions

These are the finger Templates for creating shaker box patterns. You will use these as guides to help quickly transfer the finger patterns and the drill holes onto the band blanks.

For durability, I recommend glueing this piece of paper onto some card stock before cutting.

I like to use spray adhesive and I glue 2 sheets of 110lb card stock together. Then I Glue this piece of paper to the two sheets of card stock. This creates durable long lasting templates.

I also recommend drilling all the holes on here with a small bit. You only need a hole big enough to fit the tip of a pencil in. 1/8" or smaller is ideal. Drill holes before cut the finger patterns out.
